SEND COPIES OVER REGULAR TELEPHONE LINES AT STANDARD LONG DISTANCE RATES

In the fast moving field of office communications the next great horizon is facsimile transmission. The idea of sending actual copies over telephone lines has previously been limited to only those few companies with specialized leased line facilities.

...Dataphone comes to facsimile

Today the impressive savings and unimpeachable accuracy of facsimile transmission is available to companies large and small. The Bell Dataphone permits copies to be sent over regular lines at conventional toll charges. Dial and dispatch—a copy of an 8½ x 11" missive is where you want it to be—and exactly as you want it—in less time than it would take to type it.

Dial/Datafax is an additional model to the full range of Private Line Datafax Systems. Perhaps now is the time for you to investigate these new profit-making systems.

A visual "Read-Out" System that keeps you up to date—Organizations in business or government that are moving forward with new ideas, products or services need a fast, fact-gathering system. They require swift methods that can provide them with instant visual information for inventory and planning. Datafax can eliminate error rates in transmission of production orders. It provides instant execution of sales orders, engineering reports—"Customer to factory" in a matter of minutes.

Dial/Datafax with revolutionary Bell Telephone

The Dial/Datafax system, featuring the Bell System Dataphone, can be used over any toll network or leased circuit. Its use is most feasible where comparatively low volumes of facsimile transmission are involved or where the customer can take advantage of the wide area telephone service (WATS) offering of the telephone system. Dial/Datafax is specially suited to multipoint communications in widely-varying areas giving complete flexibility of transmission.

Dial/Datafax now offers virtually...

1. *TWX-like network flexibility*—just dial and send to any compatability-equipped station, using WATS or on a toll call basis.
2. *Automatic unattended receiver operation enabling "after-hour" accessibility*. This is of great importance when the Receiver and Transmitter are located in different Time Zones!
3. 150 words per minute speed of transmitting compactly-typed information.
4. Automatic fresh-paper advance to assure perfect copy.

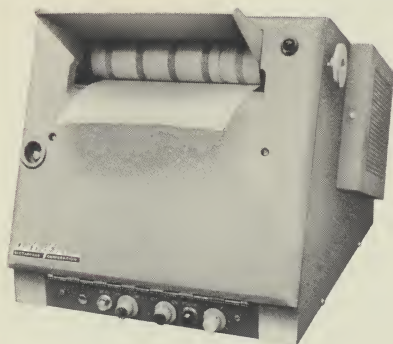

The Private Line Datafax System For The High Volume Installation Which Requires Highest Transmission Speed

The Dictaphone Datafax Private Line System operates over customer's leased circuits. The advantages of this system are:

1. Higher speed, up to 900 LPM—system can transmit 8½" x 11" sheet of copy in 1.2 minutes.
2. Excellent for high volume transmission.
3. An existing leased line can be used.

In Private Line Datafax System, Dictaphone offers *three* speeds of transmission:

1. Models 1824 (180 LPM) Letterhead sized copy in 6 minutes.
2. Models 3628 (360 LPM) Letterhead sized copy in 3 minutes.
3. Models 9095 (900 LPM) Letterhead sized copy in 1.2 minutes.

Datafax Transmitter

Dimensions—16½" wide, 15" high, 19½" deep.

Automatic Flat-Bed Loading—Inserting document into transmitter automatically activates transmitting and receiving process.

Highlights of Operation

1. Continuous transmission.
2. No drums to load.
3. Transmits full copy area—8¾" wide by any length.
4. Transmits all copy—in any color.
5. Foolproof operation by nontechnical operators.
6. Transmits over telephone lines, intercom lines, radio circuits or microwave channels.
7. Models available for speeds of 180 or 360 lines per minute. Both give sharp 96-line-per-inch definition.
8. Individual plug-in chassis design assures rapid and easy maintenance—minimum down time.

Datafax Receiver

Dimensions—15½" wide, 15" high, 19½" deep.

Instant alignment for letter-perfect copy—the receiver begins reproducing copies the moment transmission commences. Phasing is automatic; receiver shuts off automatically after receiving copy. Several receivers can simultaneously reproduce messages from one transmitter.

Highlights of Operation

1. Datafax copies are permanent, exact images of the original—will not fade or smudge.
2. Translucent, dry, odor-free copies are easily reproduced by all standard copying equipment.
3. Copy received on a continuous roll of 9¼" wide paper.
4. Paper magazine holds 400' roll of paper for greater receiving capacity.
5. Receiver automatically starts and stops recording on signal from Transmitter.
6. Completely unattended reception—no operator needed.
7. Colored and black-and-white originals received in continuous tones from white to black.
8. Received copy is always clerically accurate—a crisp and clear duplicate of the original regardless of transmission distance.

Maintenance and Guaranteed Service—One of the most significant reasons for the leasing of Datafax equipment is the after-the-lease dependability you receive from Dictaphone Corporation. The Dictaphone Service Organization is made up of over 1,000 trained personnel who work exclusively on Dictaphone product service. Dictaphone Service stations are maintained in over 300 cities throughout the United States and Canada—*within the span of a local telephone call* from every Datafax installation!

A few of the many companies now profiting from modern Datafax communications:

American Airlines	E. I. du Pont de Nemours & Co.
American Broadcasting Company	Fairchild Publications Inc.
American Telephone & Telegraph Company	General Dynamics Corporation
Belding-Hemingway Company, Inc.	General Electric Company
Bethlehem Steel Company	General Motors Corporation
Boeing Aircraft	Martin-Marietta Company
Burlington Industries, Inc.	Monsanto Chemical Company
Burroughs Corporation	Pennsylvania Railroad
Chicago Police Department	Radio Corporation of America
Collins Radio Company	Riegel Paper Company
Continental Oil Company	Scandinavian Airlines System, Inc.
	United States Steel Corporation

Everywhere You Go—Trained Dictaphone Service.
